PROFESSIONAL SUMMARY

Full-Stack Engineer with 3 years of experience developing scalable web applications and agentic AI workflows. Architected LangGraph and Model Context Protocol (MCP) integrations to automate record retrieval, eliminating **80%** of manual workflows and accelerating onboarding by **30%**. Optimized backend performance to cut API latency by **25%**, sustained platforms serving **10,000+ daily active users**, and increased user retention by **30%** through strategic UI/UX enhancements.

PROFESSIONAL EXPERIENCE

Software Engineer

September 2025 – Present

Surety Seven (007)

Delhi, India

- Exposed RESTful APIs via Swagger documentation using client ID and secret authentication, enabling seamless partner integrations and enhancing production efficiency by 30%.
- Deployed an AI RAG system for document uploads and intelligent query resolution, accelerating data extraction speeds by 40% through natural language prompts.

Software Engineer

March 2025 – September 2025

Charm AI Technology Pvt Ltd

Delhi, India

- Engineered a warranty management admin portal using Next.js, React, and TailwindCSS with Firebase, accelerating the company onboarding process by 60%.
- Implemented a RAG-based chatbot for the consumer portal utilizing embeddings and prompt engineering, enabling natural language navigation and reducing manual browsing by 50%.

Software Developer

September 2023 – March 2025

MISEMIND Technologies Pvt Ltd

Delhi, India

- Architected responsive web applications using Angular, React, and Next.js with TypeScript, serving 5,000+ active users across 20+ client projects with a mobile-first approach.
- Enhanced a Job Search platform with an AI-powered recommendation engine based on application history, improving click-through rates by 35% for 10,000+ monthly users.

TECHNICAL SKILLS

Front-End: React.js, Next.js 15+, TypeScript, JavaScript, TailwindCSS, Redux, Context API, PrimeReact, Material-UI, ShadCN

Back-End: Node.js, NestJS, Express.js, Prisma ORM, REST APIs, GraphQL, Redis, StripeJS

Databases: PostgreSQL, CockroachDB, MongoDB Atlas, MySQL

AI & Automation: LangGraph, LangChain, Model Context Protocol (MCP), RAG, Generative AI, Embeddings, Pydantic, Puppeteer

Cloud & DevOps: AWS (Lambda, S3), Docker, Docker Engine API, Vercel, Serverless Functions

Tools & Practices: Python (Typer/Rich/Pip env), Git, GitHub, Postman, Swagger, Jira, Agile/Scrum, Code Reviews

PROJECTS

Autonomous QA Agent:

- Technologies:** LangGraph, Python, Docker, LangChain, Typer CLI, Jest, Vitest **GitHub:** [QA Agent](#)
- Orchestrated a LangGraph state machine that mapped internal imports across 3+ modules using a dependency-aware topological sort to prioritize foundation testing.
- Constructed a persistent Docker Alpine execution engine that reduced pipeline overhead by 40% by handling 100% of test runs inside a single, background container loop.

Agentic AutoML System:

- Technologies:** LangGraph, Gemini API, Python, Docker Engine API, XGBoost, Pandas **GitHub:** [ML-Agent](#)
- Formulated a multi-tier AutoML pipeline using a Hierarchical LangGraph Subgraph pattern to split 80% of clean matrix data for isolated training sequences.
- Integrated a dual-gate validation script node that audited arrays for zero anomalies before executing prediction validation runs over a 20% holdout dataset.

MongoDB MCP Server:

- Technologies:** TypeScript, MCP, MongoDB, Node.js, Zod **GitHub:** [MongoDB MCP](#) - **Live:** [MongoDB MCP Live](#)
- Programmed a Model Context Protocol server equipping LLM agents with 25+ administrative tools for strict schema validation and bulk CRUD operations.
- Accelerated system capabilities by establishing automated index workflows and multi-stage aggregation pipelines to scale database management tasks by 30%.

EDUCATION

Bachelor of Vocation in Software Development

2019 - 2022

Ambedkar Institute of Technology

Delhi, India

- Graduated with Distinction - CGPA: 9.16/10.0:**
